PROFESSIONAL SUMMARY

Flutter Developer with 2+ years of experience delivering large cross-platform applications, reusable feature modules, and production workflows for Android, iOS, and Windows Desktop. Skilled in Flutter, Dart, Clean Architecture, BLoC/Cubit, REST APIs, SQLite, Firebase, WebView, and release troubleshooting. Builds assessment systems, dynamic reports, offline document access, complex JSON data flows, and interactive learning features.

SELECTED IMPACT

20+ Flutter application projects and reusable feature modules • 10+ psychological assessment modules • 10+ dynamic reports • 50+ REST API request operations • 3 delivery platforms • 10+ Android build issues resolved

TECHNICAL SKILLS

Mobile Development: Flutter | Dart | Android | iOS | Windows Desktop | Responsive UI | Animations | WebView
Architecture & State: Clean Architecture | MVVM | MVC | SOLID | BLoC | Cubit | Provider | Riverpod | GetIt | Dependency Injection
APIs, Data & Storage: REST APIs | Dio | JSON | Postman | Firebase Authentication | Cloud Firestore | Realtime Database | Firebase Cloud Messaging | SQLite | SharedPreferences | Local File Storage | Caching
Engineering Tools & Delivery: Git | GitHub | Gradle | Android SDK | AndroidManifest.xml | Build Automation | Windows Installer Packaging | App Releases | Debugging

PROFESSIONAL EXPERIENCE

Flutter Developer | ArabTesting AI | Cairo, Egypt (On-site) | Jun 2025 - Present

- Develop and maintain 10+ psychological assessment modules, covering multi-step testing flows, input validation, scoring engines, notifications, responsive UI, and report-related functionality.
- Built 10+ dynamic psychological reports with automated scoring logic, real-time data handling, and structured result workflows.
- Integrated and maintained 50+ REST API request operations across authentication, dashboards, assessments, reservations, reports, notifications, and profile workflows using Dio and structured JSON models.
- Strengthened application structure and state handling with Clean Architecture, BLoC/Cubit, dependency injection, reusable feature layers, and maintainable data flows.
- Supported releases across 3 platforms - Android, iOS, and Windows Desktop - including WebView workflows, environment-specific configuration, and installer packaging.
- Diagnosed and resolved 10+ Android release issues across Gradle, Android SDK, dependencies, and AndroidManifest configuration, improving build stability by 40%.

Flutter Developer | BlueZone Company | Kuwait (Remote) | Mar 2025 - Jun 2025

- Delivered commercial Flutter features using modular architecture, responsive UI implementation, and reusable application components.
- Established secure authentication, token-based session handling, real-time feature support, REST API integration, and robust JSON data mapping with backend teams.
- Refactored legacy modules and resolved data, UI, and Android build issues to improve readability, maintainability, runtime behavior, and release readiness.

SELECTED PROJECTS

ArabTesting Platform (assessments, reports, APIs) | **Psychological Assessment Tools** (ADHD & neuropsychology) | **Autism Learning Application** (10+ activities, STT, audio) | **Android Build & Release Modernization** (Gradle, SDK, Manifest) | **BeBeauty App** (commercial delivery) | **Dar Al-Mustafa** (end-to-end, SQLite).

EDUCATION & ADDITIONAL INFORMATION

Bachelor of Computer Science | Thebes Academy - Faculty of Computers & Information | Nov 2019 - Aug 2023 | Giza, Egypt

Languages: Arabic (Native) | English (Professional Working Proficiency)

Soft Skills: Communication | Collaboration | Teamwork | Problem Solving | Critical Thinking | Analytical Thinking | Adaptability | Time Management | Ownership | Accountability | Attention to Detail | Task Prioritization | Initiative | Continuous Learning | Organization
