MOHAMED KHALED

Flutter Developer | Android, iOS & Windows Desktop

Giza, Egypt | +20 114 583 6183 | elgallantmohamed9@gmail.com
LinkedIn | Portfolio Website

PROFESSIONAL SUMMARY

Cross-platform Flutter Developer with 3 years of experience creating Android, iOS, and Windows desktop applications. Skilled in translating product requirements into polished, adaptive interfaces and maintainable code using Clean Architecture, BLoC/Cubit, and REST API integration. Comfortable working collaboratively within development teams or independently managing technical delivery across application architecture, state management, debugging, testing, and store releases. Focused on user experience, reliability, and practical engineering solutions.

TECHNICAL SKILLS

Core & platforms: Dart, Flutter, Android, iOS, Windows Desktop, Material Design, Cupertino widgets

Architecture & state: Clean Architecture, feature-based modularization, SOLID, MVVM, MVC, BLoC, Cubit, Provider, Riverpod, GetIt, dependency injection, reusable components

Navigation, UI & UX: GoRouter, responsive/adaptive layouts, RTL/LTR, Arabic/English localization, animations, form validation, WebView, custom widgets

Backend & real-time: REST APIs, Dio, JSON serialization/mapping, authentication, JWT/token sessions, Socket.IO, API debugging, Postman, error handling

Storage & device features: SQLite, SharedPreferences, flutter_secure_storage, Firebase Auth/Firestore/FCM, file/image picking, Google Maps, geolocation, geocoding, local files

Testing & delivery: Debugging, Android SDK, Gradle, Xcode, Git/GitHub, Google Play Console, App Store Connect, TestFlight, PDF/receipt printing, Windows installers

PROFESSIONAL EXPERIENCE

Flutter Developer | BWG Trading & Investments | 14 Jul 2026 - Present

- Act as the company's sole Flutter Developer, independently implementing CRM Mobile, madaaad, Fish Link, Tomeyya Mobile, and Tomeyya Cashier Desktop.
- Build Flutter solutions from technical structure and responsive UI to state management, API integration, troubleshooting, and production-ready builds across Android, iOS, and Windows.
- Handle release and publishing workflows through Google Play Console and Apple Developer / App Store Connect; support app updates and environment-specific builds.
- Improve additional existing projects through scoped UI/UX enhancements or API-only integration work, distinct from the five independently developed products.

Flutter Developer | ArabTesting AI | Cairo | Jun 2025 - Jul 2026

- Collaborated with other Flutter developers across assessment, cognitive learning and reporting products, delivering features, integrations and technical fixes.
- Developed assessment steps, input validation, scoring/report UI, API-connected screens, dynamic report flows, and WebView-based exam experiences.
- Worked on build/debugging tasks for Android, iOS, and Windows, including SDK/Gradle compatibility and release-related issues.

Flutter Developer | BlueZone Company | Kuwait (Remote) | Mar 2025 - Jun 2025

- Contributed to BeBeauty, a commercial Flutter application, developing responsive UI, authenticated flows, REST API integration, and maintainability improvements.

SELECTED PROJECT EXPERIENCE

BWG TRADING & INVESTMENTS | INDEPENDENT FLUTTER DEVELOPMENT

CRM Mobile | Android / iOS - Enterprise CRM companion application with authenticated user flows, modular feature architecture, role-based access, API-driven screens, document handling, and Socket.IO real-time capabilities.

madaaad | Android / iOS - Shopping experience for school supplies and custom boxes, with localized Arabic/English interfaces, responsive catalog flows, favorites, location features, and navigation/state handling.

Fish Link | Windows Desktop - Desktop operations app supporting inventory, distributor orders, sales, accounts, transaction history, localization, and network-connected data flows.

Tomeyya Mobile | Android / iOS - Customer ordering and delivery workflows with catalog/cart, checkout, addresses, authentication, order tracking, and role-specific delivery actions.

Tomeyya Cashier Desktop | Windows Desktop - Restaurant POS with order and shift management, cashier/delivery roles and permissions, customer lookup, stock workflows, receipt printing, and API-based order updates.

ARABTESTING AI | COLLABORATIVE FLUTTER PROJECTS

Psychological Assessment Platform - Contributed to multi-step assessments, validation, scoring-related user journeys, results presentation, backend-integrated modules, and exam navigation.

Psychological Scales Suite - Contributed to Binet, DDI, ABS, AAS7, ARS, SMD, ADHD-T, and learning-difficulty assessments through exam screens, result workflows, and data-integrated scale modules.

Dynamic Reporting & Document Workflows - Built and refined structured report interfaces, scoring-related presentation, report downloads, and offline document access flows with backend-connected data.

Autism & Cognitive Learning Application - Contributed interactive learning activities for emotions, motor actions, classification, sequencing, counting, number ordering, RL1/RL2 and LSS4 cubes, with animation and audio-related features.

Cross-Platform Build & Release Improvements - Helped troubleshoot Android Gradle/SDK/manifest issues and supported integration of WebView-based examinations and Windows application packaging.

BLUEZONE COMPANY | KUWAIT

BeBeauty App - Commercial Flutter mobile application; contributed responsive user interfaces, secure authentication, feature development and API-connected screens within the company team.

ADDITIONAL PROJECT CONTRIBUTIONS

For other applications, delivered focused UI redesigns, screen refinements, API integrations, and feature improvements without claiming responsibility for the complete product.

EDUCATION & LANGUAGES

Bachelor of Computer Science | Thebes Academy - Faculty of Computers & Information | 2019-2023

Arabic: Native | English: Professional working proficiency
